

BMC/JHH – ED HOSPITALIZE ORDER UPDATE

How to place the Admit to Inpatient order

The hospitalize order to admit a patient into an inpatient department has been enhanced to filter the Service, which is based on the available hospital services. Previously, the service list displayed all services available to all hospitals, causing users to select from an extremely long list of choices. **EVENTUALLY**, all providers will have auto displayed service buttons available, and users will no longer have to select from the long list of service departments after selecting the Future Attending AKA the Floor Attending receiving the patient.

Try It Out

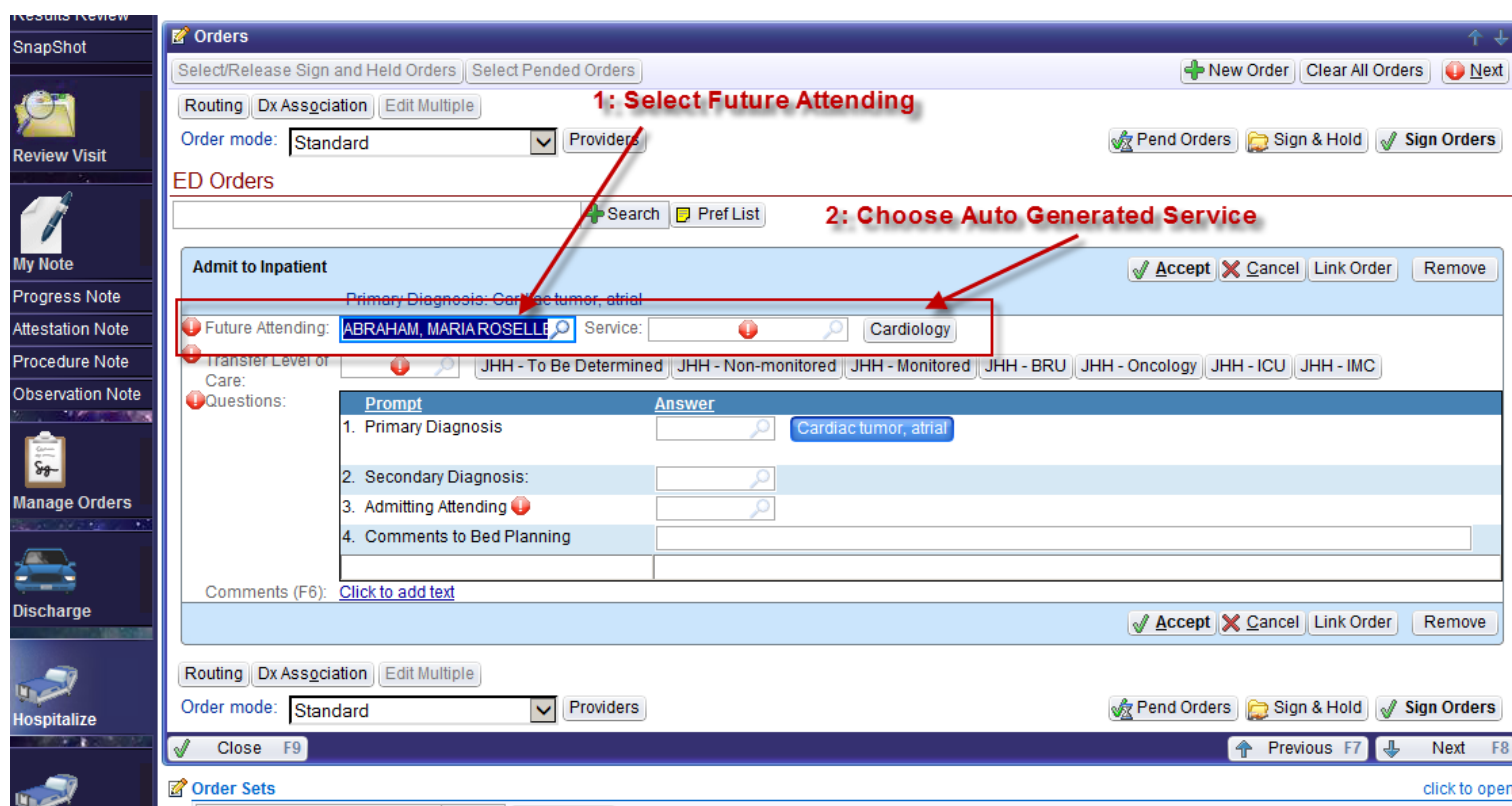

1. Go to the **Hospitalize Navigator** (formerly Admit Navigator) and open the **ED Orders** section.

Admit to Inpatient
Primary Diagnosis: Cardiac tumor, atrial
Remove

Place in Hospitalized Observation
Primary Diagnosis: Cardiac tumor, atrial
Remove

Remove the order not needed

Orders
Select/Release Sign and Held Orders | Select Pended Orders
+ New Order | Clear All Orders | Next

Routing | Dx Association | Edit Multiple
Order mode: Standard | Providers
Pend Orders | Sign & Hold | Sign Orders

ED Orders
Search | Pref List
2: Choose Auto Generated Service

Admit to Inpatient
Accept | Cancel | Link Order | Remove

Primary Diagnosis: Cardiac tumor, atrial
1: Select Future Attending
Future Attending: ABRAHAM, MARIA ROSELLI | Service: Cardiology

Prompt	Answer
1. Primary Diagnosis	Cardiac tumor, atrial
2. Secondary Diagnosis:	
3. Admitting Attending	
4. Comments to Bed Planning
