🕬 TIPS & TRICKS

## JHM ED INFECTIOUS DISEASE ASSESSMENT

How to complete the EBOLA, MERS, and POLIO Assessment

In order to complete the Infectious Disease Assessment after the initial screening by registration and nursing staff, the following steps must be taken.

## 1. Log into the ER Department and open a patient who has been triaged.

- 2. If the patient meets specific criteria as noted in the Infectious Disease Screening (pictured below), a BPA will be displayed for the Provider.
  - Note: A specific potential risk BPA will show, and it will display the fields selected in the Infectious Disease Screening. If the Provider decides that an Ebola Screening is not required, they can select the Screening Documentation Not Required At This Time button as the *Acknowledge reason* and then click Accept.

II Infectious Disease Scr	eening - Infectious Disease Risk			
You or a close cont Infectious Disease applied?: Yes	act travelled internationally in Screening: Fever at triage 3	n last 21 days: Yes 7.8 (100.04 F) and	Travel Countries I above or Repo	: Germany rted Fever Mask
Acknowledge reason:		•		P 🗅
	Screening Documentation Not Re	quired at ) 🔫 🛶 🛶		
5 Place Orders				

3. If the patient is at risk for Ebola, an **EBOLA BPA** will show. The provider may decide to complete the EBOLA Screening and document the patient's exposures.
