- Verbiage has been changed to make completing the hard stops more intuitive and clear
- 2. A Best Practice Advisory will appear reminding you to place an isolation order. If the patient does not need one, click **Not Needed** and then **Accept**:

3. Once you are finished with the Admit order and the BPA, click **Sign Orders**:

4. You will be asked for a **Cosigner** for this order so that the Attending provider will get a reminder for the Certification order:

- 5. Once the patient class has been changed to Inpatient in Keene and fed back into Epic, Attending providers will see a reminder to sign the certification order from within the patient's chart:
 - The procedure to change the patient class can take 10-15 minutes; it is not an immediate process
- 6. When the <u>ED Attending</u> logs into the patient's chart, a BPA will appear reminding them that the Certification order still needs to be placed. By clicking on the **Click Here to Place the Certification Hyperlink**, the user will be jumped directly into the Manager Orders activity:
